

Application Note: Proof of Delivery

Proof of Delivery is a common term used with postal and courier services for package tracking and delivery.

A similar requirement is also applicable for other service deliveries where **relevant and timely** deliveries must be accounted for as part of a service contract or in case of a potential customer dispute.

The Otto-Driving Companion™ road safety device incorporates a trip data logging functionality called OttoLog™. The date, time, location and speed of the vehicle is stored on the device for later retrieval to use as proof that a delivery or site-visit was made or attempted.

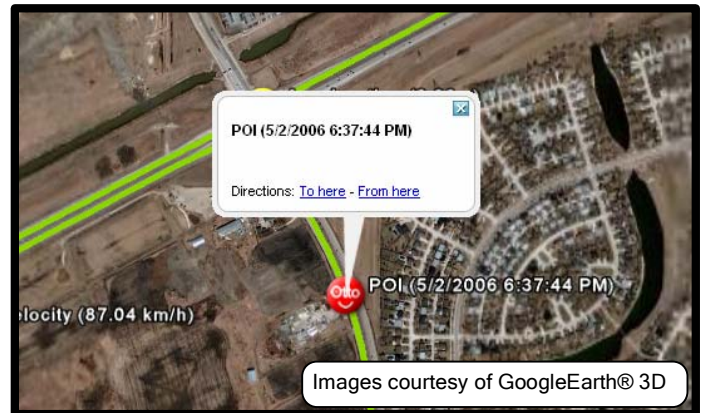

The data files contain the trip information that can be exported as a summary report, individual trip reports, or as exported data for back-office administrative applications.

The data files can also be exported to GoogleEarth® 3D or to Microsoft® Streets and Trips™ mapping application software.

Proof-of-delivery service examples:

- ✓ Pizza delivery
- ✓ Home-care worker services
- ✓ Contractor site visits
- ✓ Lawn & garden care on-site services
- ✓ Water delivery
- ✓ Handi-transit patient services
- ✓ Driver-training route validation

OttoLog

OttoLog		Report Parameters				
Trip 1 Details		Log Start:	3/8/2007 6:46:24 PM			
		Log End:	3/8/2007 9:33:47 PM			
		Otto Serial Number:	01005			
		Logfile Name:	Otto1005-march9-07.ipi			
		Logging Interval:	1 second(s)			
		Timezone:	(GMT-05:00)			
Start	Event Reason	Latitude/Longitude	Distance (km)	Duration (h:m:s)	Max Speed (km/h)	Unlocked Time (h:m:s)
